PROFESSIONAL SUMMARY

Highly motivated software engineer with 3+ years of experience designing and implementing scalable, API-driven services and full-stack applications. Proficient in cloud-native development, microservices, and event-driven systems, with expertise in Java/Spring Boot, React, and PostgreSQL. Experienced in collaborative, agile teams delivering high-quality solutions with TDD, CI/CD, and trunk-based development practices.

SKILLS

- | | |
|--------------------|-----------------------------------|
| • Java/Spring Boot | • Node.js |
| • Python | • TypeScript |
| • RESTful APIs | • Event-Driven Architecture |
| • Microservices | • Serverless |
| • React | • Next.js |
| • React Native | • Redux |
| • Docker | • Kubernetes |
| • AWS | • CI/CD (GitHub Actions, Jenkins) |
| • PostgreSQL/MySQL | • SQL |
| • HTML/CSS | • Test Automation |
| • Git/GitHub | |

EXPERIENCE

Lead Full-Stack Engineer (Contract), 05/2025 - Current

Hospitality Guest Ordering & Operations Platform – McKinney, TX

- Architected and delivered a cross-platform Progressive Web App (React/Next.js) supporting restaurant and retail ordering, CRM, and real-time operational analytics.
- Built backend services with Java/Spring Boot and PostgreSQL, using event-driven architecture for live order tracking and analytics dashboards.
- Integrated Stripe for secure tokenized payments and deposit workflows, ensuring safe and compliant transactions.
- Designed role-based authentication and access controls for guests, staff, and admin with isolated data flows.
- Delivered end-to-end solution from prototype to production-ready system, including architecture decisions, documentation, and deployment planning.

Software Development Engineer, 06/2021 - 11/2023

Anko Retail, Inc. – Seattle, WA

- Built scalable microservices and RESTful APIs for inventory management across 300+ stores using **Java/Spring Boot** and Node.js.
- Developed internal tools for automated data integrity testing and SFTP file transfer/processing.
- Designed responsive UIs in React and Next.js; wrote comprehensive backend integration and unit tests.
- Collaborated in agile teams with CI/CD pipelines, trunk-based development, and event-driven data processing.

Software Engineer Intern, 01/2021 - 05/2021

UNT Cyber Forensics Lab – Denton, TX

- Assisted in design and development of a mobile app for theft and identity protection using React Native.
 - Implemented real-time security rating updates, geolocation features, and user authentication.
 - Developed permissions-based functionality for multiple user roles, enhancing app usability and security.
-

EDUCATION

Bachelor of Science: Computer Science, 05/2021

University of North Texas - Denton, TX
